FerroBlack

Informazioni Tecniche

FerroBlack	Carrier	Pigment	Carbon Black	Basic Application
Black Masterbatches for LDPE – PP - EVA				
PE-1018	PE/EV	18%	High Colour	Compounding / Moulding / Thick film - Low cost
PE-1020	LDPE	20%	High Colour	Compounding / Moulding / Thick film
PE-1045	PE/EV	43%	High Colour	Compounding / Moulding – Low cost
PE-1048	LDPE	48%	High Colour	Compounding – High colour strength
PE-1051	LDPE	50%	Medium Colour	Pipe / Compounding / Extrusion
PE-1055	LDPE	55%	Medium Colour	Pipe / Compounding / Extrusion
PE-1073	LDPE	40%	High Colour	Compounding – Film – High colour strength
PE-1080	LDPE	40%	P-Type	Film to 20 micron – High UV stabilisation
PP-6373	PP	30%	P-Type	PP Fiber and Film grade – High UV stabilisation
PE-91740	LDPE	40%	FDA Grade	Compounding / Moulding / Extrusion FDA grade
EV-91412	EVA	45%	High Colour	Compounding of EVA crosslinked
Black Masterbatches for Engineering Polymers				
PA-16640	PA6.6	30%	High Jet	Compounding / Moulding PA6.6
PA-6044-30	PA6	30%	High Jet	Compounding / Moulding PA6 and 6.6
PA-6088-30	PA6	30%	P-Type	Compounding / Moulding PA6 and 6.6
PA-1630	PA6	30%	High Jet	Compounding / Moulding PA6 and 6.6 low cost
PA-1033	PA6	40%	Nigrosine	Compounding PA6 glass fiber – aesthetic grade
PBT-1715	PBT	15%	Nigrosine	Fibers / Compounding PET and PBT
PC-2575	PC	25%	High Jet	Compounding / Moulding PC
PET-702	PET	30%	High Jet	Sheets / Film / Compounding PET
UN-1350	UN	50%	Bluish Jet Black	Compounding / Moulding – High colour strength
UN-1390	UN	50%	High Jet	Compounding / Moulding – highest strength High Jet
UN-1391	UN	50%	Jet Black	Compounding / Moulding – general purpose Jet Black
UN-1392	UN	50%	High Colour	Compounding / Moulding – High colour strength
UN-1399	UN	50%	Jet Black	Compounding / Moulding - general purpose Jet Black
ABS-1535	ABS	35%	High Colour	Compounding / Moulding / Extrusion
PS-93405	PS	35%	High Colour	Compounding / Moulding - cost effective high strength
